Start Up & How to control temperature?

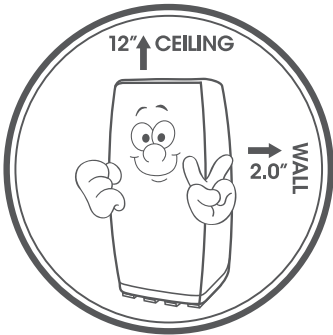

*Maximize refrigerator performance
and energy efficiency. Read on
and find out how.*

1A. START UP

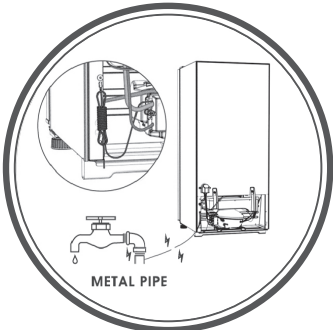

1. Place refrigerator on a firm & flat surface; and away from direct sunlight & heat sources (like oven or stove).

2. Leave at least 2 inches of space between ref and wall; and 12 inches of space between ref and ceiling or overhead cabinet.

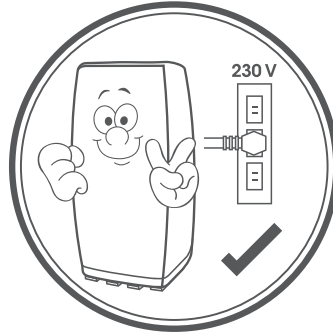

3. For safety reason, it is advisable to ground the unit by connecting the ground wire provided at the back of the unit. Do not connect the grounding wire to any gas pipes or phones lines.

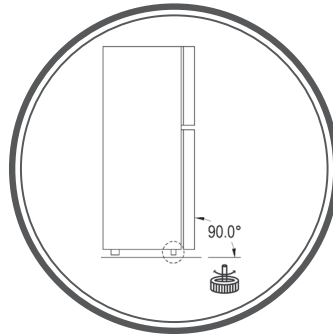

4. Let the motor oil settle down for 3-4 hours before plugging-in the refrigerator.
5. Plug the refrigerator directly to a wall outlet (230V).

Do not use extension cord.

6. Allow the refrigerator to cool for 3 HOURS BEFORE LOADING FOOD & BEVERAGE ITEMS. Pre-cool with the temperature control knob set at: "3" settings.
7. Turn the temperature control knob to the appropriate setting after loading. Please refer to item 1B & 1C., page 5 & 7 for proper settings.

8. To compensate for floor unevenness, adjust clockwise or counter clockwise the leveller located on the lower front corners of your refrigerator. It is recommended that the unit be slightly tilted backward to allow defrosting water to flow inward during defrosting.

CAUTION or WARNING:
Install the unit in a well ventilated location.

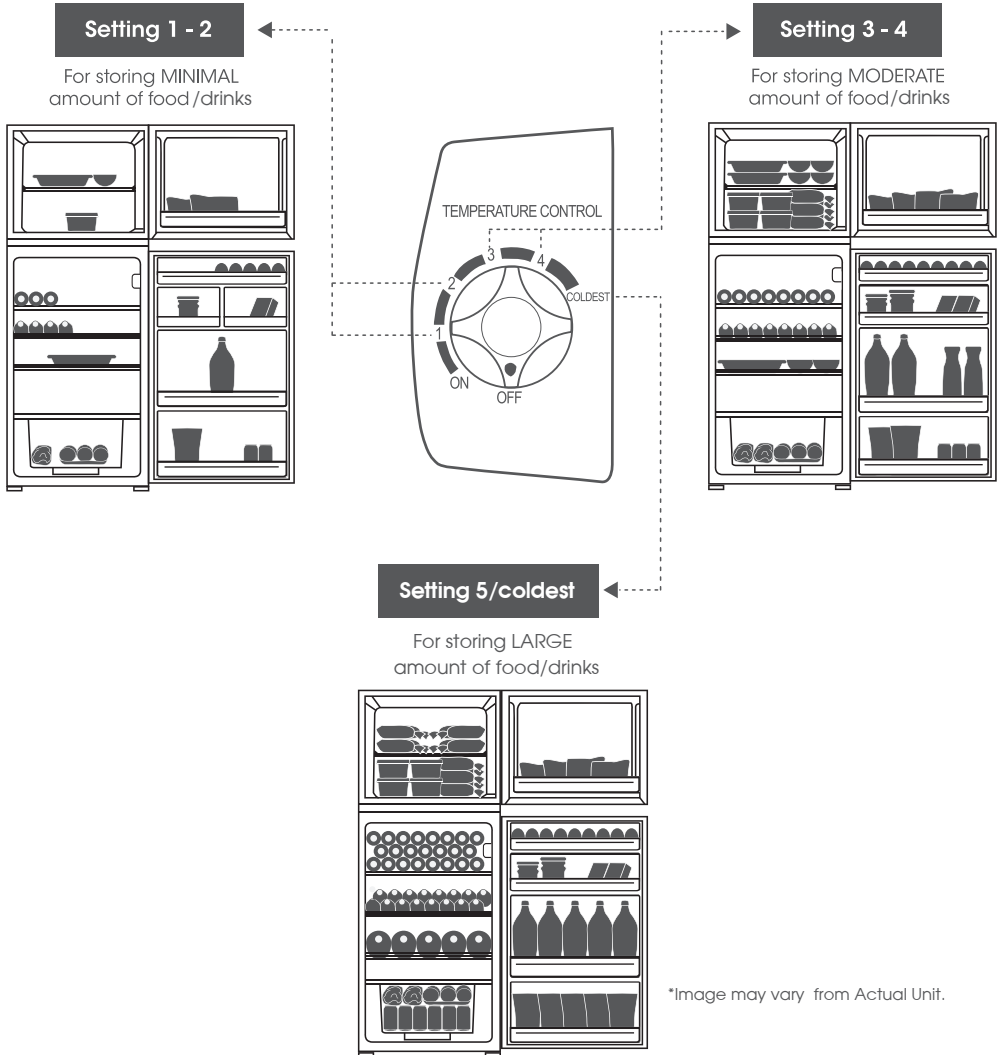

1B. HOW TO CONTROL TEMPERATURE BASED ON REFRIGERATOR CONTENTS

FOR TWO DOOR MODELS:

Setting 1-2: For storing MINIMAL amount of food/drinks.

Setting 3-4: For storing MODERATE amount of food/drinks.

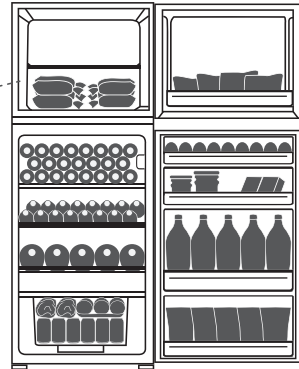

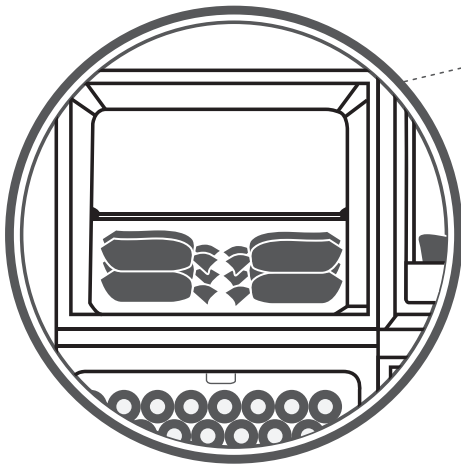

Setting 5: For storing LARGE amount of food/drinks & for faster freezing.

*Image may vary from Actual Unit.

When freezing ice bags:

Arrange ice bags properly for faster freezing.
Temperature control knob must be set at "5".

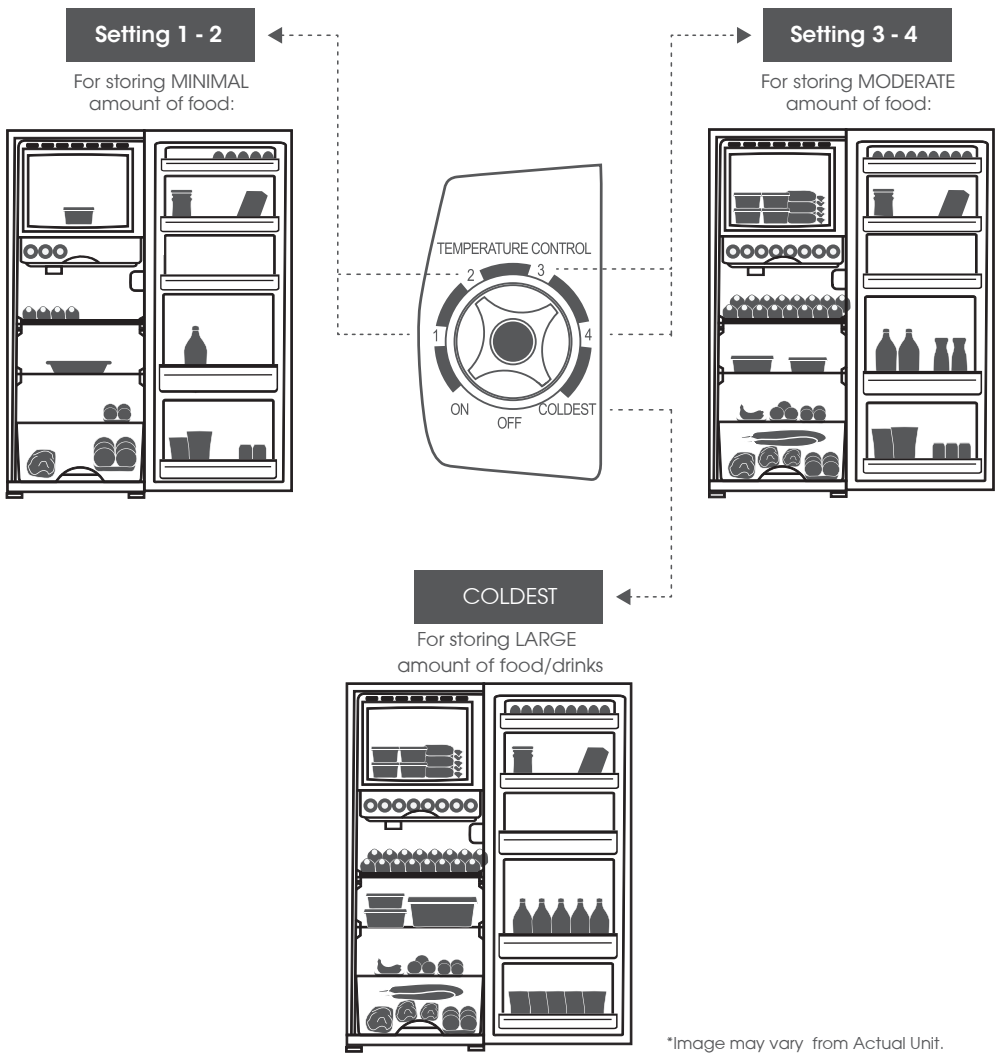

*Image may vary from Actual Unit.

1C. HOW TO CONTROL TEMPERATURE BASED ON FOOD PLACED IN REF

FOR SINGLE DOOR MODELS:

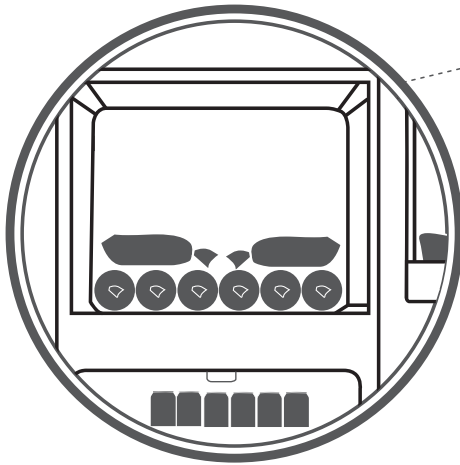

- Setting 1-2:** For storing MINIMAL amount of food/drinks.
- Setting 3-4:** For storing MODERATE amount of food/drinks.
- Setting 5:** COLDEST for storing LARGE amount of food/drinks & faster freezing.

*Image may vary from Actual Unit.

When freezing ice bags:

Arrange ice bags properly for faster freezing.
Temperature control knob must be set at "coldest"

*Image may vary from Actual Unit.

②

How to clean & defrost?

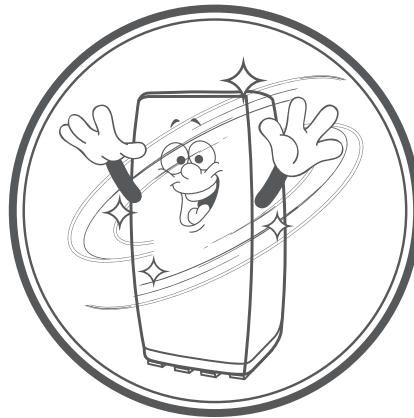

Proper maintenance is essential in saving electricity. Just follow these easy steps in cleaning and defrosting your ref.

2. DEFROSTING & CLEANING

Defrosting is necessary when ice formation is already 1/2 inch thick.

Two-Door Models (Manual Defrost)

- Step 1 - Set the temperature control knob to "OFF" then unplug refrigerator.
- Step 2 - Remove ref contents - including racks and shelves.
- Step 3 - Leave the freezer and ref door open until ice has melted.
You may also use the ice scraper provided.
- Step 4 - Clean inner walls of the ref and freezer with damp cloth.
- Step 5 - Wipe rubber gasket, ref & freezer doors and cabinet with cloth.
- Step 6 - Empty and clean drain pan.
- Step 7 - Plug refrigerator. Set temperature control knob to "3" setting.
- Step 8 - Return food and beverage items after 1 hour.
Re-Adjust temperature control knob to its proper setting based on ref contents.

Single-Door Models (Semi-Automatic Defrost)

- Step 1: WITHOUT turning off the temperature control knob and unplugging the ref, press the ONE TOUCH DEFROST BUTTON.
- Step 2: Remove ref contents - including racks and shelves (for washing) EXCEPT the "CHILL TRAY".
- Step 3: (Optional) Leave freezer door and ref door open until ice has melted.
- Step 4: Clean inner walls of the ref and freezer with damp cloth.
- Step 5: Wipe rubber gasket, ref and freezer door and cabinet with dry cloth.
- Step 6: Empty and clean chiller.
- Step 7: Set temperature control knob to "3" setting. Ref automatically turns on when the defrost button pops up.
- Step 8: Return food and beverage items after 1 hour.
Re-Adjust temperature control knob to its proper setting based on ref contents.

CAUTION or WARNING:

Do not use mechanical devices or other means to accelerate the defrosting process.

3

Safety

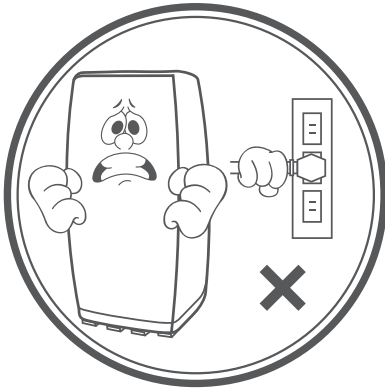

- Do's & Don'ts

Better SAFE than SORRY.

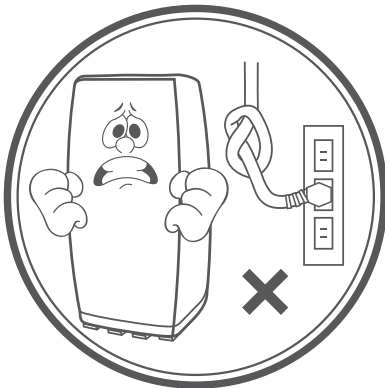

3. SAFETY

A) POWERCORD

1. Call Customer Care Hotline or any authorized service center immediately for repair or replacement of exposed and damaged power cord.
2. When touching or cleaning the plug, make sure your hands and rug are dry.
3. When unplugging, always grip the plug firmly and do not yank the power cord.

4. Do not plug refrigerator in loose sockets.
5. Ensure that the power cord is not bent excessively or pressed down by a heavy object.

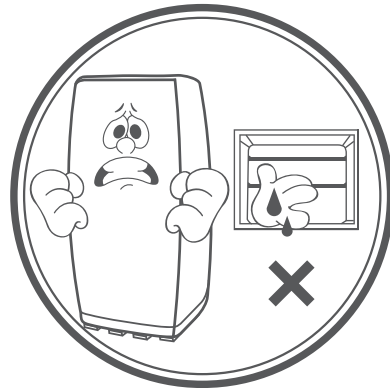

6. Do not use extension cord.

B) STORAGE

1. Storing hazardous materials, such as ether and benzyne, can cause an explosion.
2. Do NOT store bottled drinks in the freezer.

C) HANDLING

1. Call customer care hotline or any authorized service center immediately if problem/s are encountered. Do not attempt to disassemble or repair refrigerator.
2. Do not touch the freezer's inner wall with wet hands to avoid frost bite.
3. Avoid water contact in areas near the temperature control knob to prevent shock hazards.

D) DISPOSAL

Please contact local authorities for the proper disposal of your refrigerator. The gas in the insulation material requires special disposal procedure.

CAUTION or WARNING:

1. Do not let the children and lack of experience and knowledge to play or operate the appliance.
2. Do not use sharp objects or tools that may cause damage to the refrigerant circuit.
3. Do not use electrical appliances inside the food storage compartments of the appliance.
4. The LED Light must not be replaced by user! If the LED Light is damaged, it is highly recommended to have our authorized service personnel to do the replacement for you.

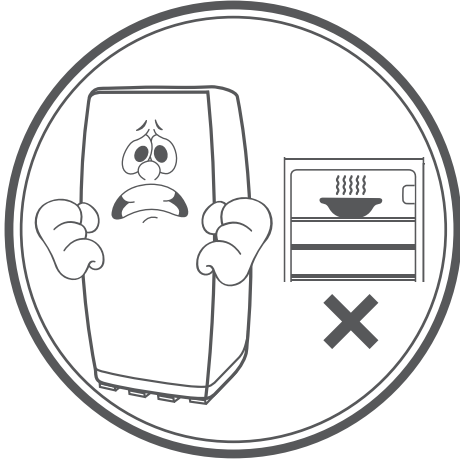

4

Energy

Earn more and save more.

4. ENERGY SAVING TIPS

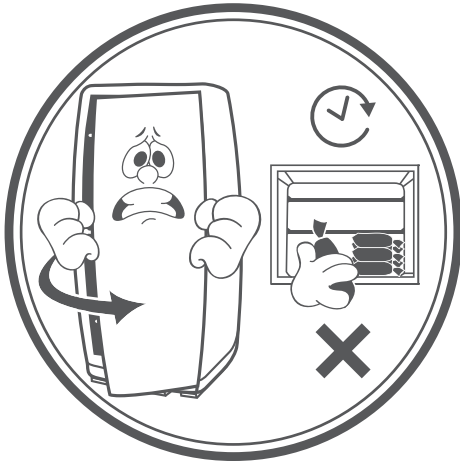

1. Cool down hot food items first before placing inside the refrigerator.

3. Properly adjust temperature setting according to refrigerator load.

4. Defrost and clean refrigerator regularly.

2. Do not keep the ref or freezer door open for too long when putting in or taking out food or beverages.

5

How to keep food fresh?

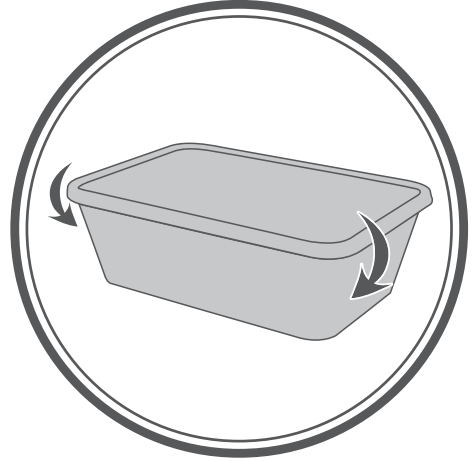

*Keep food fresh for your
business and home.*

5. KEEPING FOOD FRESH

1. Cool down hot food items first before placing inside the refrigerator.

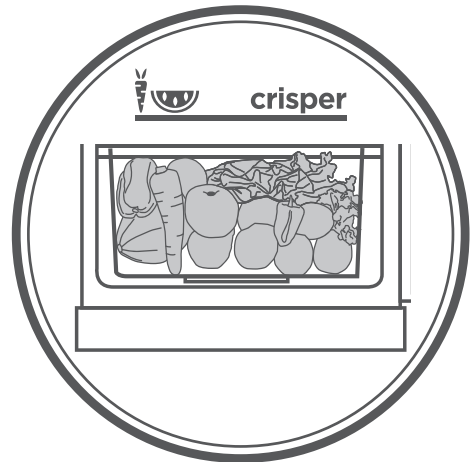

3. Cover food containers with lid, cling wrap or plastic bag.

2. Dry fruits and vegetables before storing in the refrigerator.

4. Store vegetables in the crisper pan.

6

Troubleshooting

Things to check before calling customer service or any of the authorized service centers.

6. TROUBLE SHOOTING GUIDE (BEFORE CALLING CUSTOMER SERVICE)

PROBLEMS ENCOUNTERED	CHECK IF
1. When refrigerator would not turn ON:	<ol style="list-style-type: none"> 1. The power cord is properly plugged. 2. The temperature control knob is in "OFF" position.
2. When refrigerator is not cooling:	<ol style="list-style-type: none"> 1. The temperature control knob is set according to refrigerator load. 2. The refrigerator & freezer doors are tightly shut. 3. The lamp turns off while the ref door is being closed.
3. When the refrigerator emits foul odor:	<ol style="list-style-type: none"> 1. There is spoiled food or drink inside the refrigerator. 2. The drain pan is free of accumulated water. 3. The refrigerator is thoroughly cleaned after defrosting.
4. When there is dew or moisture in the vegetable compartment:	<ol style="list-style-type: none"> 1. The ref door is tightly shut. 2. The crisper pan is properly installed and not pushed all the way back.
5. When there is sweating in the exterior ref cabinet during cold weather:	<ol style="list-style-type: none"> 1. The temperature control knob is set according to refrigerator load. It is also recommended that the temperature be set lower during cold weather. 2. The refrigerator & freezer doors are tightly shut. 3. The sweat looks like condensation on the window of an air-conditioned room on a rainy day.
6. When refrigerator makes "unusual noise" like sizzling, ticking or humming:	<p>Please note that these may be normal sounds that indicate that your ref is working properly:</p> <p>"Sizzling" - This <u>indicates</u> the refrigerant passing through the freezer compartment.</p> <p>"Ticking" - This <u>indicates</u> be the thermostat control is turning on and off.</p> <p>"Humming" - This is the sound of the working motor.</p>
7. When there is ice formation on the inner back wall of the ref compartment (2 door models):	<p>This is a natural characteristics of the cold wall design because the ref has its OWN cooling system. The ice melts away when the desired temperature is achieved. It is best to always set the temperature control knob properly to avoid excessive ice build-up. It is also important to defrost when needed.</p>
